## **Plymouth Creek Athletic Club Group Fitness Schedule**

**Step & Strength:** 1 hour class that will raise your cardio with Step work paired with sections of both weighted and non-weighted exercises that will help tone and build your muscles.

**Yoga For Healing:** Physical Therapy Stretching for the entire body. Open to all levels.

**Tai Chi:** a series of gentle physical exercises and stretches. Each posture flows into the next without pause, ensuring that your body is in constant motion. **Tai chi** is sometimes described as meditation in motion because it promotes serenity through gentle movements — connecting the mind and body.

**Chair Strength & Balance:** Designed to increase muscle strength, range of movement and improve activities for daily living. A chair is used for seated exercises and standing support and class can be modified depending on fitness levels.

**Mat Pilates:** Empower your body with functional strength, light cardio, and mindful stretching. Core focused pilates, light cardio bursts, and full body stretching to help you feel strong, stable and energized.

**Balance & Stretch:** This no to low impact class will challenge your balance with use of different equipment...be prepared to use your core! Added with functional full body stretching to increase blood flow and relieve muscle tension for an overall workout that will MAKE YOUR DAY!

**Boot Camp Fitness:** A variety of intense but low impact exercises designed to improve your cardiovascular endurance. It may be low impact, but it will be effective.

**Slow Flow & Stretch:** A welcome and much-needed break from the stress and speed of day-to-day life. Grab a mat, don't forget your water bottle, and relax into a soothing sequence. This yoga practice will leave you feeling centered, energized and renewed every Monday.

**Vinyasa Flow:** This class pushes you to dive deeper into your practice. The focus is on alignment and breath, and a special emphasis on proper technique helps you refine your form. Helps build and maintain strong bones, muscles, and connective tissue to maintain a high metabolism, healthy posture and active and alive body. The physical work of vinyasa flow ensures strength, balance and function to maintain a healthy life. Designed to feel better in the mind and body.

**Slow Flow & Breath:** Slow down and get connected to the breath, the present moment as we get juicy in the hips and get acquainted to our bodies. Practicing yoga not only enhances your physical body and fitness, but also purifies your energetic body. It does so by gradually unblocking your energy pathways, or Nadis, so that your life-force, or prana, can flow freely with the aim of awakening your latent energy, known as kundalini.

**Strength Yoga:** A fitness and strength-based yoga that will challenge you while still enjoying the stretching and breathing benefits of traditional yoga

**Posture Pilates:** A series of exercises which are deliberate, safe yet profound activities to keep or get better posture. Focusing on function in ALL the major and minor muscles that contribute to your posture: the entire spine, the neck, collar bones and shoulder blades as well as ribs, diaphragm, belly, and (of course) the hips! Posture Pilates Class will help you feel lighter, taller and have you breathing deeper!

**HIIT Circuit Training:** Commonly known as high intensity interval training designed to increase your heart rate for short bursts of time using strength training.

**MAJIC: Movement for Arthritis and Joints and Increasing Circulation:** Fifty-minute class focuses on deep breathing techniques, adapted dry brushing aka lymph stimulation as well as circle/undulating activities for all joints, including hands, feet limbs and core.

**Rhythm & Cues:**
